

Marketing Campaign Analytics

1. Which channel delivers the best ROI?
Compare average ROI and Conversion_Rate across each Channel_Used to identify the most cost-effective channels, then reallocate budget toward top performers.
2. How efficient is our customer acquisition?
Analyse Acquisition_Cost against Conversion_Rate and ROI by Campaign_Type and Channel_Used to find where we spend the most to win a customer versus where we get the best value.
3. Which customer segments and audience groups convert best?
Break down Conversion_Rate and ROI by Customer_Segment, Audience_Group and Target_Audience to reveal the highest-value segments worth targeting.
4. What is the relationship between Clicks, Impressions and Conversions?
Compute Click-Through Rate ($\text{Clicks} \div \text{Impressions}$) and correlate it with Conversion_Rate and Engagement_Score to see whether reach actually translates into results.
5. How do campaigns perform across demographics?
Segment performance by Gender and Age_Group to understand which demographic profiles respond most strongly to each Campaign_Type.
6. Which locations and languages drive the most value?
Rank Location and Language by ROI, Conversion_Rate and Engagement_Score to guide geographic and localisation strategy.
